# NOF INTERNATIONAL OLYMPIADS SYLLABUS FOR CLASS 9

## NOF INTERNATIONAL MATH OLYMPIAD

You will find a comprehensive collection of Class 9 mathematics questions covering a wide array of topics essential for both school exams and competitive tests like Olympiads. The questions span Number Systems, Polynomials, Coordinate Geometry, Linear Equations in Two Variables, Introduction to Euclid's Geometry, Lines and Angles, Triangles, Quadrilaterals, Areas of Parallelograms and Triangles, Circles, Constructions, Surface Areas and Volumes, Statistics, Probability, and Logical Reasoning. Each question is meticulously designed to challenge and enhance your understanding, from basic concepts to advanced problem-solving techniques. By engaging with these questions, you will strengthen your mathematical skills, build confidence, and excel in your academic journey and competitive examinations alike.

## NOF INTERNATIONAL SCIENCE OLYMPIAD

We have meticulously selected questions from all the essential topics in the Class 9 Science syllabus to provide a comprehensive preparation tool for Olympiad exams. The chapters covered include “Matter” “The Living World,” “Motion, Force, and Work,” “Environment,” and “Food Production.” Each multiple-choice question (MCQ) is designed to test your understanding of fundamental concepts and your ability to apply them in different scenarios. They challenge you to think critically and apply your knowledge in novel ways, which is crucial for success in Olympiad exams. Each question is designed to test various cognitive levels, from basic recall of facts to higher-order thinking skills like analysis, synthesis, and evaluation.

## NOF INTERNATIONAL CRITICAL THINKING OLYMPIAD

Critical thinking is the intellectually disciplined process of actively and skillfully conceptualizing, applying, analyzing, synthesizing, and/or evaluating information gathered from, or generated by, observation, experience, reflection, reasoning, or communication, as a guide to belief and action. In its exemplary form, it is based on universal intellectual values that transcend subject matter divisions: clarity, accuracy, precision, consistency, relevance, sound evidence, good reasons, depth, breadth, and fairness.

**It entails the examination of those structures or elements of thought implicit in all reasoning: purpose, problem, or question-at-issue; assumptions; concepts; empirical grounding; reasoning leading to conclusions; implications and consequences; objections from alternative viewpoints; and frame of reference.**

Critical thinking -- in being responsive to variable subject matter, issues, and purposes -- is incorporated in a family of interwoven modes of thinking, among them: **scientific thinking, mathematical thinking, historical thinking, anthropological thinking, economic thinking, moral thinking, and philosophical thinking**
